Parveen Kumar

QA Automation Engineer | Quality Analyst | SDET

9306116168 | pk6222307@gmail.com | LinkedIn

Professional Summary

Quality Analyst / QA Automation Engineer with **3+ years of experience** in software quality assurance, web application testing, regression testing, API validation, and test automation. Experienced in testing and automating workflows across **Shopify Multi-Vendor Marketplace, UVdesk Ticket Management System, and BookingCommerce**. Skilled in **Playwright, TypeScript, Postman, defect tracking, and root cause analysis**, with a focus on improving test coverage, repeatability, and application reliability.

Technical Skills

Automation Testing: Playwright, TypeScript, UI Automation, Locators, Assertions, Page Object Model (POM)
Testing: Functional, Regression, Smoke, Sanity, UI, End-to-End, Negative, Boundary, Cross-Browser Testing
API Testing: Postman, REST APIs, JSON, XML, HTTP Methods, Status Code Validation
Programming & Databases: TypeScript, JavaScript Basics, SQL, MySQL, Python Basics, Data Validation
QA Practices: Test Scenarios, Test Cases, Test Execution, Bug Reporting, Defect Lifecycle, Root Cause Analysis
Tools & Methods: Git, GitLab, VS Code, Agile/Scrum, CI/CD Concepts

Professional Experience

Webkul Software Pvt. Ltd. Noida, India
Quality Analyst / QA Automation Engineer *Oct 2023 – Present*

- Performed functional, regression, smoke, and end-to-end testing for e-commerce, ticket management, and booking applications.
- Developed and maintained selected UI automation workflows using **Playwright and TypeScript** to make repetitive test execution more consistent and repeatable.
- Designed test scenarios covering positive, negative, boundary, and exception cases to evaluate application behavior against business requirements.
- Validated REST API requests and responses using **Postman**, including response data, HTTP status codes, and expected outcomes.
- Documented defects with reproducible steps, expected and actual results, and supporting evidence; re-tested fixes and performed regression checks.
- Collaborated with developers and product stakeholders to investigate defects, identify root causes, and improve application quality before releases.

Product Testing & Automation Projects

Shopify Multi-Vendor Marketplace (MVM) Project Link

- Tested seller registration, product listing, inventory management, and order-processing workflows to verify critical marketplace functionality.
- Created UI automation scripts using **Playwright and TypeScript** for selected seller and product-management workflows.
- Validated positive, negative, and boundary scenarios to identify functional defects, data inconsistencies, and unexpected workflow behavior.
- **Impact:** Improved repeatability of regression checks for critical seller workflows and reduced reliance on repetitive manual verification for automated scenarios.

UVdesk Ticket Management System Project Link

- Tested ticket creation, agent assignment, replies, status transitions, and ticket-resolution workflows.
- Automated selected ticket lifecycle scenarios using **Playwright and TypeScript** to support consistent re-validation after application changes.
- Verified ticket statuses, assignment behavior, and related backend records using application checks and SQL, where applicable.
- **Impact:** Strengthened regression coverage for ticket lifecycle operations and helped identify status-handling and workflow-related defects.

BookingCommerce Booking Management Project Link

- Tested booking creation, date and time-slot selection, booking status updates, cancellations, and rescheduling workflows.
- Developed automation scenarios using **Playwright and TypeScript** for selected booking flows, form validations, and negative test cases.
- Checked booking details and business-rule behavior across successful and unsuccessful scenarios to identify validation issues.
- **Impact:** Improved repeatability of booking-flow regression checks and strengthened validation of date, slot, and booking-status behavior.

Education

Ch. Devi Lal State Institute of Engineering & Technology Haryana, India
B.Tech in Computer Science & Engineering – CGPA: 8.3 *Oct 2020 – Jul 2023*

Guru Brahma Nand Govt. Polytechnic Haryana, India
Diploma in Computer Engineering – 76.5% *Jul 2017 – Aug 2020*
